OUR VISION

Innovation: We strive to be at the forefront of technological advancements in pool design, constantly pushing the boundaries of what is possible. Our commitment to innovation ensures that each pool is a unique masterpiece, incorporating cutting-edge features for an unparalleled swimming experience.

Craftsmanship: At the heart of our company is an unwavering dedication to craftsmanship. Our skilled artisans meticulously handcraft each pool with precision and attention to detail, ensuring that every curve and contour reflects the epitome of quality and aesthetic appeal.

Sustainability: MyPoolDirect is committed to environmental responsibility. Our pools are made from recyclable and eco-friendly durapolymer materials, minimizing our ecological footprint. We actively seek sustainable practices in our manufacturing processes to contribute to a healthier planet for future generations.

MY POOL DIRECT® is a trusted swimming pool UK distributor, based in Essex known for selling quality inground pools. Our knowledgeable team has been committed to the outdoor sports, leisure, and home & garden industries for over 17 years.

Over 1800 residential one-piece swimming pools have been sold manufacturer-direct throughout the United Kingdom. Our EXCLUSIVE Bespoke Pools combined with a pool enclosure is an incredible investment, potentially raising the value of your property.

A garden swimming pool the Reflections Range is a perfect way to enjoy outdoor sports and leisure family time – as pictured in the MY POOL DIRECT BLOG.

MyPoolDirect envisions a future where the ripple effect of our commitment to excellence and sustainability resonates in every backyard, creating moments of joy, relaxation, and lasting memories for generations to come. During more than ten years of activity on the market, we began to cooperate with customers in Germany, Austria, Switzerland, Belgium, Holland, Great Britain, Sweden, Romania and Bulgaria.

03

DURAPOLYMER
POOLS

MyPoolDirect's skimmer, overflow and Infinity pools are made of durapolymer sheets produced by German company Röchling. The sheets are welded to the required size and shape by an automated butt welding method on a special welding bench. Thanks to these welds, we are sure that our pools are 100% impermeable. The advantage of Durapolymer pools is the possibility of producing a custom pool exactly according to your requirements. The pool skeletons can be produced in three different thicknesses of polypropylene: 6mm, 8mm and 10mm. The supporting elements are always made of 10 mm material, which provide the required evenness and strength. All our materials are UV stabilized, harmless to health and also suitable for salt water treatment.

POOL ENCLOSURES

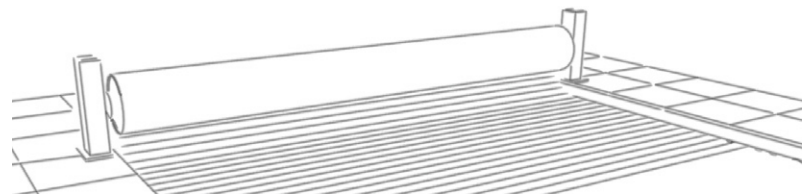

The enclosure has become an integral part of the pools. Extension of the bathing season and the possibility to use the pool even in case of bad weather, clean and hot water, reduction of costs for operation and cleaning of the pool, protection of the pool from the effects of weather and especially safety – roofing protects you and your children.

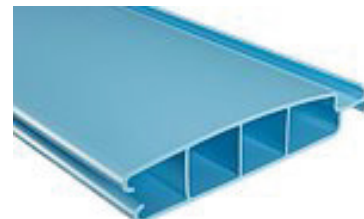

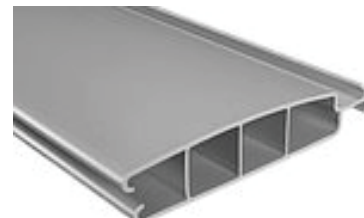

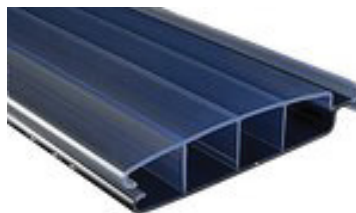

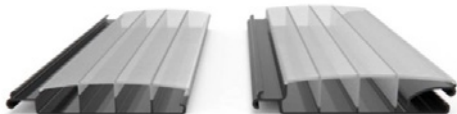

PoolDo offers enclosures that meet the most demanding criteria and customer requirements.
